

Online Summer Camp · Years 9 to 13 & School Leavers

Future-Ready Camp

School teaches the syllabus. We teach everything else: how to think clearly, how to use AI wisely, how money really works and how to speak up with confidence.

● Small weekly cohorts

● 5 days, live & online

● Ends with a live showcase

Weekly cohorts · July to August 2026

— WELCOME

Is your child ready for the world they're stepping into?

We built the Future-Ready Camp because parents kept asking us the same question, and school didn't seem to have an answer. Over five days online, students in Years 9 to 13 (school leavers up to 21 are welcome too) work in small teams on one real challenge, learning the skills the syllabus rarely covers: critical thinking, sensible use of AI, financial literacy, an entrepreneurial mindset and confident communication. It is not a subject booster, and we designed it that way on purpose.

— WHY THESE SKILLS, WHY NOW

★ Thinking comes first

When we ask parents which skill matters most for their child's future, critical thinking comes up before anything technical. So we made it the backbone of the entire week.

AI Used well, not banned

Most teenagers already use AI. Very few have been shown how to use it properly. We teach it as a study partner rather than a shortcut, and we are upfront about exam rules.

£ Money sense, made real

Around nine in ten parents want their children taught about money beyond the home. We cover it in plain English, from budgeting to how UK student finance actually works.

” Skills employers ask for

Universities and employers keep telling us the same thing: young people need to communicate, collaborate and solve real problems. Every student on our camp pitches live on Friday.

5

days, Mon to Fri

15+

live tutor led hours

4 or 5

students per team

1

real case challenge

100%

live & online

"By Friday you will pitch a real solution to a panel, with your parents watching." We make that promise on Monday morning, and it changes how students show up for the rest of the week.

HOW THE WEEK WORKS

One team. One challenge. Five skills.

On Monday, every student joins a team of four or five and receives a real business case challenge. Each day's skill feeds straight into it. On Friday, the teams pitch their solutions live to our judging panel while parents watch.

11am to 2pm UK

3 live hours, daily

Skill workshop

expert led, interactive

Team lab

applied to the case

Daily mission

a short take home task

DAY 1 • MON Think Like a Strategist

- ✓ We show students how to break big problems down the way consultants do, and how to separate facts from assumptions
- ✓ Teams receive their case challenge and build their first structured analysis together

DAY 2 • TUE The AI Advantage

- ✓ How AI actually works, where it goes wrong, and how to catch it when it sounds confident but is mistaken
- ✓ Using AI as a study partner rather than a ghostwriter, always within exam board rules

DAY 3 • WED Money Sense

- ✓ Budgeting, compound interest, credit, buy now pay later schemes and scam awareness, all in plain English
- ✓ Business money made simple: revenue, costs, profit and breaking even, applied to the team's own case

DAY 4 • THU Communicate to Convince

- ✓ How to structure a persuasive pitch, present naturally on camera and handle questions calmly
- ✓ Everyone speaks. No passengers. Teams build and rehearse their final pitch

DAY 5 • FRI Showcase + Futures

- ✓ Careers of the future and the full map of UK pathways, from A Levels and T Levels to apprenticeships and university
- ✓ The live showcase, where every team pitches to our judging panel with parents in the room

Watch your child pitch

The whole week builds towards one moment. Each team presents its solution to our judging panel, and parents are invited to watch. It is the clearest possible answer to the question every parent asks: what did you actually do this week?

1

The pitch

Each team presents for around seven minutes, then takes live questions from the panel.

2

The judging

We score on clarity of thinking, use of evidence, financial sense and delivery.

3

The celebration

We crown a winning team, and every student receives a named certificate and an individual shout out.

4

The debrief

A short parents' session follows, with practical ways to keep the momentum going at home.

What every family takes away

- ✓ A named **Certificate of Completion**
- ✓ An **individual Skills Report** within 48 hours, covering the strengths we observed, one growth area and our recommended next steps
- ✓ A real team project your child can talk about in **UCAS statements, interviews and applications**
- ✓ Practical tools they keep using: our AI study rules, a budget template and a pitch framework

Same programme, every week

We run the camp as identical weekly cohorts across the summer, so there is no sequence to fall behind on and nothing to miss. Simply pick the week that suits your family.

Mon 13 July

Mon 20 July

Mon 27 July

Mon 3 Aug

Mon 10 Aug

Mon 17 Aug

Mon 24 Aug

We make flexible arrangements for students in results weeks, and we always offer free transfers to a later cohort.

✓ 5 linked days

✓ Small cohorts

✓ Live showcase

✓ Individual Skills Report

— PRACTICAL INFORMATION

Everything you need to know

● Small by design

We keep every cohort small and work in teams of four or five, with our facilitators moving between rooms so every student is seen and heard.

● Fully online

We deliver everything live over Zoom with a shared class workspace. All your child needs is a laptop and a quiet spot.

● Safeguarding first

Every member of our team holds an enhanced DBS check. We have a named safeguarding lead, a strict two adult rule online and locked, registration only sessions.

● Your data, respected

We keep a plain English privacy notice, comply fully with UK GDPR and only ever use photos or recordings with your explicit consent.

We offer places by conversation, not checkout

We keep every cohort small, and we speak with every family before confirming a place. That way we can understand your child's goals and make sure the week is genuinely right for them. Get in touch and we will arrange a short, friendly chat with no obligation.

— FREQUENTLY ASKED

Who is the camp for?

Students in Years 9 to 13, and school leavers up to 21 are welcome too. Your child doesn't need any background in business, finance or AI. Curiosity is enough.

Is this a subject booster?

No. We built it to complement schoolwork by teaching the thinking, money and communication skills the syllabus leaves out.

How much time does it take?

Three live hours a day, from 11am to 2pm UK time, plus a short daily mission of around half an hour. Afternoons stay free for summer.

How do we secure a place?

Contact us to register your interest. We will arrange a short call with you first, then confirm your child's place on the week that suits your family.
